

INDOOR FISHING GAME

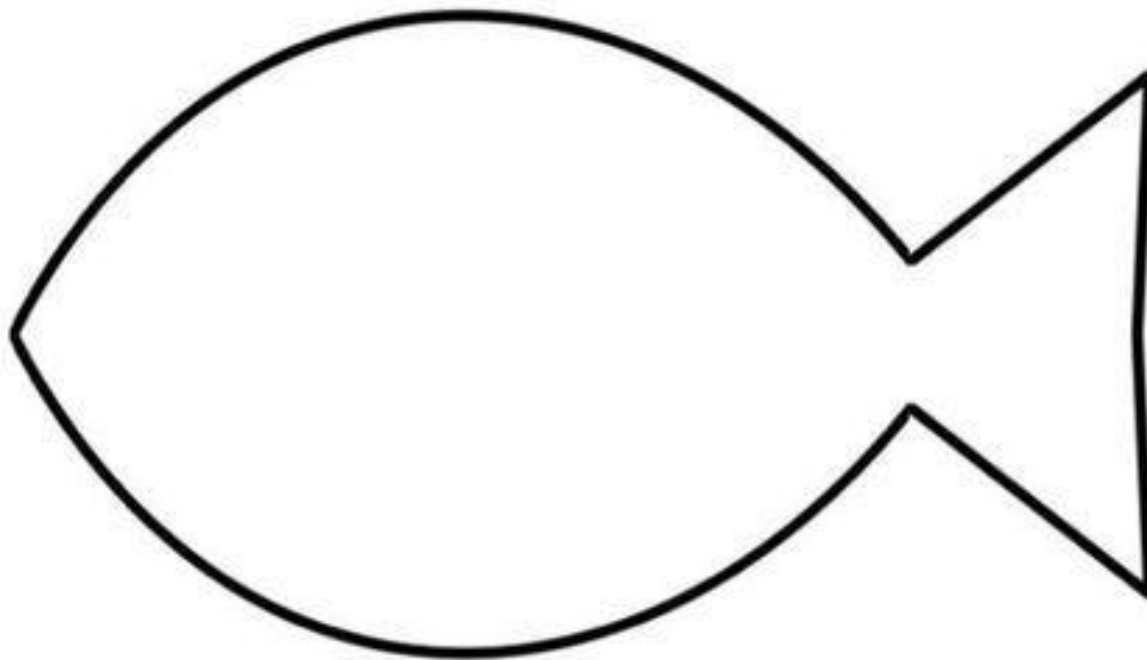

Fish: Cut out 13 fish or more from the construction paper. (Be sure to make an odd number so that there is a winner) Your child can decorate the fish if they like. Attach a large paperclip to the side of each fish using tape (or glue.)

Fishing Pole: take your chopstick and tie a string (about 12 inches long) to the end of it. Tape the string on once it is tied so that it cannot fall off. (Hot glue or a stapler also works) Now attach the other end (the loose end) of the string to the magnet. You can use tape or hot glue to attach this piece. Repeat this until you create the desired number of fishing poles.

Once attached you are ready to play!

Take the fish and spread them out all over the floor paperclip side up. You can either set a timer for one minute or just fish until all of the fish have been caught.

Whoever catches the most fish wins!
